Subject: Health Care Fraud

I am a 60 year old who owns her house and runs my own business.

When I first became a member of CareFirst Blue Cross Blue Shield (CFBCBS) I was paying somewhere in the neighborhood of \$240 per month for my premiums which covers only me. Today I am paying \$542 per month still for only me being insured. This is way beyond my means to pay. I have been forced to reduce the medicine I take and fewer visits to the doctor.

I would like to know if my health improves how can I get CFBCBS to reduce my premiums. Has this ever been done? If not, can I be the first?

I need help with paying this enormous amount of money for health insurance.

This is enough to make you sick!!!! I have to take on another job so that I can stay afloat. This should not be...this amount of money for one person?????
