

Where Do 4th and 5th Graders Go to School the Following Year?

Feeder Pattern Analysis of DCPS Elementary and ES/MS Education Campuses

The table below describes where 4th and 5th graders in SY2012-13 attended school the following school year (SY2013-14). This table includes both 4th and 5th graders because many public charter middle schools start at 5th grade. The purpose of this table is to show where elementary students continue on for middle school. In some cases, they enroll in large numbers at their destination DCPS feeder school(s) but in other cases they enroll at other DCPS or public charter schools. Bold and italicized *middle schools* indicate the designated DCPS feeder schools. An example of how to read this table is 26 Barnard ES 4th and 5th graders attended Paul Public Charter Middle School in SY13-14, 10 Barnard 4th and 5th grade students had no information about where they attended in SY13-14 due to the fact they may have moved, dropped out or was a matching error, 6 Barnard 4th and 5th grade students attended EL Haynes the following school year, and another 80 Barnard ES students attended other schools the following year with less than 6 students each.

Total of 4th and 5th Graders in SY2012-13 Continuing onto Next Grade in SY2013-14	5,687		

Source: OSSE student-level data matched between SY2012-13 and SY2013-14

Notes: Data includes only those students who were in 4th or 5th grade in SY2012-13. **Middle schools** (bolded and italicized) indicate official designated DCPS middle school feeders for the indicated elementary school. "No data available on school attended in SY13-14" in the SY2013-14 column means that the 4th or 5th grader could not be matched to a school the following year because either the students were not enrolled in DCPS or public charter schools in SY2013-14 or that there was an administrative matching error. "Other" in the SY2013-14 column refers to the number of students attending more than one DCPS or public charter school. These schools could not be displayed for confidentiality purposes because the number of students was less than or equal to 5 students.
