I 062	Continued From page 1 staff used dish detergent only and no bleach agent had been added for sanitizing. During the environmental inspection on July 29, 2009, at 11:55 AM six plastic drinking cups were stored in the cabinet above the sink. The cups had moisture in them. In addition, a cooking pan was observed with to be extremely worn and rusted. The facility's House Manager indicated she was not aware there was worn pans/or rusted pans being stored in the cabinet. She further indicated that all cooking and dinner ware should be maintained, cleaned and stored properly. There was no evidence presented at the time of survey to substantiate that the (GHMRP) had maintained sanitary conditions for their cups and cooking materials.	I 062	3502.20 Staff has been trained on proper air drying of dishes on the dish rack. A bigger dish rack has been purchased. Rusted pans have been discarded and new ones purchased.
